1.   IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Read and understand all the instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this product near water (for example, near a bath tub, kitchen sink, swimming pool).
5. Do not expose the telephone to direct sunlight or extreme cold environment. Do not put the telephone close to heating sources such as radiators, cookers, etc.
6. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
7. Unplug this product from the wall outlet and refer servicing to VTech/ distributor under the following conditions:
    • When the power supply cord or plug is damaged or frayed.
    • If the product does not operate normally by following the operating instructions.
    • If the product has been dropped and the cabinet has been damaged.
    • If the product exhibits a distinct change in performance.
8. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
9. Do not use the telephone to report a gas leak in the vicinity of the leak.
10. Use only the supplied NiMH (Nickel Metal Hydride) batteries! The operation periods for the handsets are only applicable with the default battery capacities.
11. The use of other battery types or non-rechargeable batteries/primary cells can be dangerous. These may cause interference and/or unit damages. The manufacturer will not be held liable for damage arising from such non-compliance.
12. Do not use third party charging bays. The batteries may be damaged.
13. Please note the correct polarity while inserting the batteries.
14. Battery should not be exposed to excessive heat such as bright sunshine or fire and immersed in water.

DISPOSAL WARNING

1. When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the European Directive 2002/96/EC.

2. All electrical and electronic products/battery should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

3. The correct disposal of your old appliance/battery will help prevent potential negative consequences for the environment and human health.

8. ANSWERING MACHINE

Your phone includes a telephone answering machine that records unanswered calls when it is on. The LCD display (two digits seven segment display) on the base will show the number of the messages when the answering machine is on. The answering machine can store up to 59 messages within the maximum recording time of approximately 14 minutes. As well as recording incoming messages, you can record memos for other users of your phone. If the answering machine memory is full, the Handset will display **TAM FULL** and the handset name alternatively in standby, or display **TAM FULL** and the date/time information in standby which depends on which kind of information (Handset name or Date/Time) is selected to display in idle mode.

8.1 Turn On/Off the Answering Machine

You can turn on or off the answering machine through the handset. When the answering machine is set to **ON**, calls will be answered after the set answer delay and the caller can then leave you a message. When the answering machine is set to **OFF**, calls will be answered after 10 rings and the answer only message will be played to your callers. They will not be able to leave you a message.

To turn the answering system on or off:

  It will change to **ANS & RECORD** mode automatically after some messages have been deleted.

8.5.10   Call Screening

When the answering machine is set to **ON** and when there is an incoming message, the base will start call screening automatically after the preset numbers of rings of answer delay.

At any time if you want to pick up the call, you can press ↘ on the handset and the message recording will be stopped automatically. If the answering machine is in the process of recording, the message already stored will be saved.

9. TROUBLESHOOTING

Problem	Solutions
My telephone does not work at all.	• Make sure the batteries are installed and charged correctly. For optimum daily performance, return the handset to the telephone base after use. • Remove and reinstall the batteries, then charge for up to 16 hours. If the problem isn't solved, purchase new batteries. • Make sure the power adapter is securely plugged into an outlet not controlled by a wall switch. • Make sure the telephone line cord is plugged firmly into the telephone base and the telephone wall jack.
Common cure for electronic equipment.	If the telephone is not responding normally, put the handset in the telephone base. If it does not respond, try the following (in the order listed): • Disconnect the power to the telephone base. • Disconnect the batteries on the handset. • Wait a few minutes before connecting power to the telephone base. • Re-install the batteries and place the handset in the telephone base. • Wait for the handset to synchronize with the telephone base. Allow up to one minute for this to take place.

12. CARE AND MAINTENANCE INSTRUCTIONS

Take care of your telephone

- Your cordless telephone contains sophisticated electronic parts, so you must treat it with care.
- Avoid rough treatment.
- Place the handset down gently.
- Save the original packing materials to protect your telephone if you ever need to ship it.

Avoid water

- You can damage your telephone if it gets wet. Do not use the handset in the rain, or handle it with wet hands. Do not install the telephone base near a sink, bathtub or shower.

Electrical storms

- Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electric appliances during storms.

Cleaning your telephone

- Your telephone has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap.
- Do not use excess water or cleaning solvents of any kind.

NOTE

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone base should fall into water, **DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND TELEPHONE LINE CORDS FROM THE WALL.** Then pull the unit out by the unplugged cords.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.

DISPOSE OF USED BATTERY ACCORDING TO THE INSTRUCTIONS.
